Subject: Re: IGCE for Gold King Mine Response

Steven,

Much appreciate the effort to assist. I'll look at this in the AM. Thanks !

Gentlemen,

Enclosed please find the IGCE I developed on your behalf based upon our discussions and some of the ER, LLC initial estimates for subcontractors and the data gaps from 8/23/2015. I projected out to 10/31/2015, which gives you a lot of runway. Please see the assumptions in the attached PDF and let me know how much ER, LLC is going to be involved south of San Juan County going forward, since all my IGCE focuses on the work ahead at the mine site before you're blocked by snow.

RCMS Cost Projection Version 2.0.3 is required to open the backup file and manipulate the data therein. I've enclosed instructions from the ERT Support for how to upgrade versions in the attached e-mail entitled "Updated Cost Projection Executable."

The attached backup cost projection file extension needs to be changed from .piz to .bak to enable RCMS to be able to open it. I had to change the name to keep the file from being blocked by our servers. Open RCMS Cost Projection and point to the renamed file when you Restore from Backup in RCMS Cost Projection.

Let me know if you have any questions and let me know how else I can assist.
